About This Software

Professor Teaches Business Planning is an easy to use computer training software designed to help you prepare a business plan outline. It will take you from your initial ideas for a business to writing a basic business plan to executing the final business plan. As you develop the business plan and define the actual business, you will also determine the goals of the organization and the company strategy.

What is Business Planning?
A business plan is a strategy plan that helps businesses look towards the future. It outlines specific aspects to improve in the business such as inefficiencies and potential opportunities. Business plans are important to both small businesses and large corporations.

What are the Benefits of Learning Business Planning?
With a written business plan you can:
Plan and Start a Small Business
Apply for a Business Loan or Investment
Improve Your Current Business

What You Will Learn in Professor Teaches Business Planning
Our extensive computer training course will cover the following topics:
• Introduction to Business Planning
• Developing the Business Plan
• Defining Your Business

• Defining Business Strategy / Goals
• Business Forecasting
• Completing the Business Plan
• Finding Investors / Funding

Features of Professor Teaches Business Planning

• Practice in a Realistic Simulation of the Software
• Hundreds of Learning Topics
• 4 to 8 Hours of Training per Course
• Realistic Simulations
• Beginner to Advanced Topics
• Self-Paced Learning Objectives
• Introductions and Summaries
• Interactive Exercises
• Professional Voice Narration
• End-of-Chapter Quiz Questions
• Check Marks for Completed Topics
• Glossary, Index, and Search
• Professor Answers for Instant Training

English

Normally enjoy relaxing with this type of game, but a speed run is required to unlock the next level. Hence a relaxing game turns into a fast paced panic. Sorry I don't enjoy this.

Graphics are okay, soundtrack is not too irritating, but the gameplay is just meh.

You can find better.. A fan of the Alien film(s) and the classic Alien games, this game with headphones and really good speakers up to the highest volume increases the immersion of being scared of the xenomorph. You do get a little use to it running around but depending on the difficulty depends on how violent the alien is, harder the more violent the easier the less violent.

I will keep replaying this over and over just because it has always been a game I always wanted to play when I was young. Yes it is hide and seek but what do you expect when you're not millitary but an engineer wanting to find out what has happened to your mother.. Looks simple but actually is quite difficult, I LOVE IT!!!!
have completed the first couple Acts and really enjoyed it so far,
would recommed if you enjoy a good solid platformer double reccomend if you have a friend to play with,
that why i was interested in this game.

https://youtu.be/BDaPPlMztpY. 9/11 will destroy tower again. Everything is black. All I see is the blood of the melons I've slaughtered. I was eventually viciously murdered then savagely eaten by the melons.. This is a nice game , i remember when i was 8 years old i was playing a similar game and i loved it so much but it disepeared , anyway i recomand this game even for low pc is a aawesome experience!

This is certainly one of the best game of this decade. The storywriting is so complex and deep, with various characters like "Giant rat" and "gnoblin" with their motivations tied deep in their character arch.

Dont even get me started on the genius level game desing. You will never know where are the ennemies which will create a constant tension and have you stressed out the whole game. The first level is one of the best first level in all my gaming experience, the game will always find a way to secretly tell you where to go ! I never even been close to being lost.

The soundtrack is magnificient piece of art. Better than Skyrim's, And the sound desing is so realistic that while wearing my headphones I tought it was real ! Seriously dont even hesitate, buy this game !!!!

I almost forgot to talk about the gameplay, this game is very hard. It is the dark souls of boss fighting games ! I was legitimately scared by the ennemies because of their enormous power, but it turns out that your character is an olympic sprinter and buy pressing two directions button at the same time you got twice as fast ! That is a neat easter egg that the developers INTENDED to put in the game. Seriously a lot of people don't understand this game, and it is sad.

"This is truly a misunderstood piece of art."
10/10
- Binkiklou. You thought this was an easy game...

Think again.

Because that frog will be plaguing your dreams from that one time you accidentally shot the blue ball in between the two purple balls because you double right clicked.

Be warned.

But on a serious note, sizzle down with this game and watch your life fade away as you get absorbed into the simplicity of the game.
. Best benchmark software on steam. You either love it or hate it. I love it, all my friends hate it. They hate it because they can't play it as well as I can. I can't get enough of it. You like fighting games and anime but want pretty much all the iconic anime characters a non-anime watcher will recognize, then get this game. Wait for it to go on sale though, because ninety dollars is pretty hefty.. plays not bad but, warehouse still has issues, the skids get green okay indicator but, will not register for being in proper location.
Also when trying to load trucks from warehouse same problem, green for okay but, have to work to try and get skid on proper location to finish job.
Okay game for all other jobs, but, until warehouse issue is fixed would wait to recommend. More like clicking simulator
